DİN İŞLERİ BAŞKANLIĞI

1. The use of prayer beads, towels, slippers and water glasses don't used in the mosque and their removal until the threat of the virus disappears.
2. The limbs that should be washed while taking ablution in mosques must be washed thoroughly with liquid soap. For this reason, liquid soap must be kept in toilets and fountains.
3. Common towels should never be used to dry after ablution.
4. As long as the virus threat persists inside and outside the mosque, it should be advised to avoid close contact, especially shaking hands.
5. The interior of the mosque should be frequently ventilated.
6. It should be ensured that other activities in mosques other than basic mosque meetings are not held until the virus threat passes. Maximum hygiene measures should be taken for the places and users who use them in compulsory situations.
7. Until the threat of the virus passes, worship with the congregation, especially Friday prayers, should not be extended outside the mandatory borders, and the mosque's stay in the mosque should be limited as much as possible.
8. If there are the smallest signs of disease (fever, fatigue, dry cough, breathing difficulties, cough, pain, runny nose, sore throat, etc.) from our community, they must be directed to a health institution.
9. Those who show these symptoms should be advised to perform our health-sensitive and high-risk congregations at their homes.
10. Our mosque community should be regularly informed about the virus in question, and this circular should be placed in a place where our community can read it.
